DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 5-7, 15, 84-108, drawn to a method of ablating and/or coagulating tissue, classified in class 604, subclass 509.
- II. Claims 31, 34-83, 17 and 24, drawn to an apparatus for ablating and/or coagulating, classified in class 607, subclass 101.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product, such as using the product to determine the length and width of an organ for medical treatment purposes other than to select an ablation power which is proportional to the measured length times the measured width.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3763

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Conclusion
